Wednesday, June 17 <sup>th</sup>	Bowling/IT
Thursday, June 18 <sup>th</sup>	Physical Fitness/ Badminton/projects
Friday, June 19 <sup>th</sup>	Swimming/Camper's choice

#### Day Camp

This week cabin one and two began their summer full of fun and excitement! We learned several new games and met many new friends. Ms. Urbancic taught us how to make homemade volcanos using household materials and sand from the playground. We also got to go for a cool swim at the pool and played water basketball. We cannot wait until next week!

Day Camp Staff

### Young Adult

Young Adult is looking forward to another exciting summer. Fitness, friendship, and fun adventures is what we aim for. Our days will consist of a morning fitness, competitive organized sports, and swimming. In the afternoon we will work on hands

on creative activities including arts and crafts, cogmotics, and imaginative inventions. We are also going to find time for hiking, canoeing, bowling, beach trips, alligators, Everglades, trampolines, and more!

Hope you are as excited as we are!

## Summer School

This week, we began with an introduction of staff and became acclimated with summer school procedures. For social skills, conversation such as greeting and salutations was reinforced. To enhance penmanship skills, beginning cursive letter writing and short words were taught and implemented. Math skills, such as drill and practice in addition, subtraction, multiplication, and division were integrated. For tactile learning, blocks, cubes, and beads were used to strengthen math skills, color and shape

recognition. Technology was also used as a fun way to reinforce learning. Summer School Staff

#### Aftercare

During the first week of aftercare we had a great

time. We played X-Box games and the students took turns with each other. Mrs. Jaime also played board games with the students and taught some of them how to play checkers and guess who. We also had fun playing with Legos and colored beautifully in coloring books.
